

1 Bend wire in the middle, insert tooth into bend

2 Wrap right wire over left tip

3 Wrap left wire over right tip

4 Twist two ends tightly around the back of the tooth

5 Place the ring on the wire

6 Twist the wire to hold the ring in place

7 Insert a string and you're done!
Have an adult solder the ring & wire for more durability.

Materials Needed:

- Shark's Tooth (or plastic bear claw)
- Thin Wire (4 inches long)
- Ring (Optional - can make a loop with the wire)
- Wire cutter (or sissors)
- Solder & Soldering iron (optional)
- String for necklace
